December 29, 2023

Dear Property Owner:

Section 193.461, Florida Statutes, requires the Property Appraiser to annually classify, for assessment purposes, all lands within the county as either agricultural or non-agricultural.

For those lands classified as agricultural, three approaches are available to the Property Appraiser for determining an equitable assessment. They are the cost approach, market approach, and income approach. Although each approach is considered, agricultural lands are income-producing properties; therefore, the greatest emphasis is placed on the income approach.

Capitalizing a net income computes an assessment from this approach. The net income is the result of deducting expenses from gross income. Therefore, the accuracy of the assessment for your property depends on the validity of the income and expense information used to compute the net income. The quality and availability of the income and expense information lie entirely with you: the owner/operator of the agricultural endeavor. Only you know the actual costs, the productivity, and the income received from this productivity.

Please be advised that this office considers income and expense information confidential. You may be assured that we will store and process it as such. It would be to your benefit to join this office in its efforts to assign an equitable assessment to your property by providing the above information as soon as possible.

Also, please be advised that under the provisions of Section 194.034, Florida Statutes, a petitioner is prohibited from using information requested and not received by this office before the Special Master or Value Adjustment Board to support a petition contesting a conclusion of value.

If you have any questions related to the above, please contact us by phone at 941-861-8200, email AG@sc-pa.com or visit our web page for more information on agricultural classifications¹.

Respectfully,

Bill Furst, CFA
Sarasota County Property Appraiser
